Re: 2024 NC RMT Schedule

Attached to this memo you will find the NC RMT Schedule for 2024. Please feel free to distribute to whomever within your organization you see necessary. I also recommend printing and including it along with the latest version of the FCC EAS Operating Handbook at all operating positions, obtainable at <https://www.fcc.gov/general/eas-test-reporting-system>.

Note the March RMT is subject to change as it has been coordinated with the National Weather Service as part of their Severe Weather Preparedness Week.

Please direct any questions or comments to me at the email address or number below.
